

ER14335

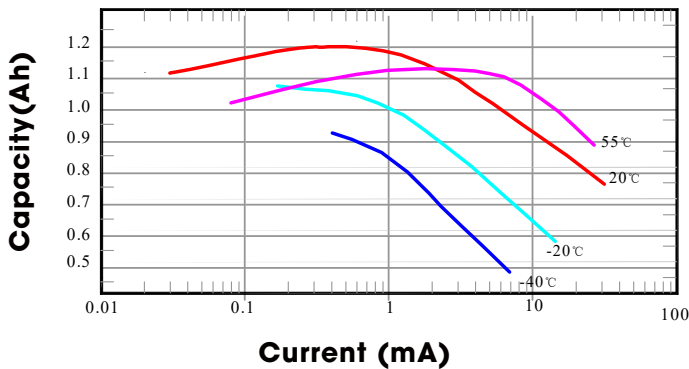

3.6V / 1.65Ah

Lithium Thionyl Chloride Battery

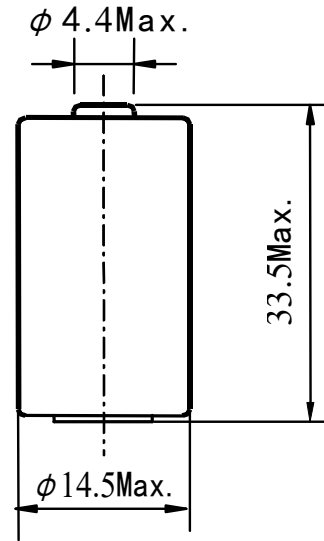

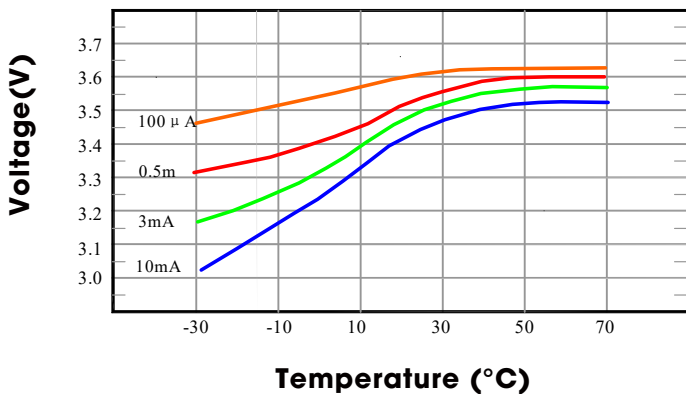

DISCHARGE CHARACTERISTICS AT 23±2°C

CAPACITY VS. CURRENT

VOLTAGE VS. TEMPERATURE

ELECTRICAL CHARACTERISTICS:

SPECIFICATION: (23 ± 2°C)

Nominal Capacity (1.3mA~2V): 1.65Ah

Rated Voltage: 3.6V

Max Constant Current of Discharge: 75mA

Max Discharge Current (Pulse): 150mA

Operating Temperature Range: -55°C~85°C

Weight (approx): 13g

S: STANDARD TERMINATION

Notes:

Dimension:mm

Special terminations can be made as requested.

T: Solder tabs

P: Axial pins

Important Notes:

Do not short or charge the battery.

Over-discharging, crushing, incinerating, and disassembling the battery are prohibited.

Do not heat/use the battery beyond the permitted temperature range.

U.L. Component Recognition MH 45782
